

SET IT AND FORGET IT

THE PROVIDER'S AUTOMATED RAPID-VOLUME INFUSER

When there's no time for error, there's FluidNow™

FluidNow is an automatic rapid-volume infuser for use in any pre-hospital and in-hospital setting. It is straightforward—simplifying and speeding up the infusion process: pick the volume and press 'Start.' No need to pump it up—unlike other infusers, FluidNow is designed for a “set-it-and-forget-it” approach to complete fluid infusion, allowing you to focus on other critical aspects of care.

FLUIDNOW™ PUSHES CRITICAL VOLUME IN LESS THAN CRITICAL TIME

	Standard Manual Infuser	FLUIDNOW™
Delivery	✗ Continuous hand pumping	✓ Fully automated
Provider attention	✗ Must remain with bag	✓ Free-up for other care
Low-flow warning	✗ None	✓ Alerts on low-flow and near-empty bag
Tubing	✗ Varies by device	✓ Standard IV administration sets
Modes	✗ Single, manual rate	✓ RAPID, KVO 50, ART 300
Flow consistency	✗ Inconsistent, requires provider pressurization	✓ Dynamic pressurization

FluidNow is effective for managing any patient needing fluid resuscitation, arterial line monitoring, or maintenance of access site, including
